About Us

Incorporated in 2021, Venturo Solutions is proudly a 100% bumiputera and has emerged as a trusted and invaluable energy service provider in Kuala Lumpur, Malaysia. Venturo is strategically located in the heart of south east asia. Throughout joint ventures and strategic alliances and partnerships, we are becoming a regional player with representation in Brunei, Singapore, Indonesia, Thailand and Vietnam.

As a young dynamically driven company, we are always seeking for change with innovative technology to meet the industry's demands of tomorrow. Our management holds an indisputable reputation for consistently and safely delivering operational excellence to our Clients.

We minimise risks. We reduce downtime. We maximise productivity.

We deliver niche technologies

Technologies

Venturo is always going after niche, disruptive & innovative technology. Partnering with best in market, Venturo aims to set the trail in terms of best and most innovative technologies available in the industry.

Quality Management System

We at Venturo believe that Quality Assurance and Quality Control are vital aspects of our products and services because no degree of project planning, data processing or interpretative insight can compensate for poor quality deliverables, poor data or poor data management.

With emphasis on reputation, Venturo is committed to delivering high quality products and services to our clients worldwide.

Venturo focuses on safe and efficient operations, with emphasis on health, safety and due respect to the environment. All of our personnel are well-trained, qualified and experienced. We aim to provide high quality services, with the latest, most efficient and reliable equipments, according to our customer's requirements.

Venturo aims to conduct its business by adopting a proactive attitude before its customers and stakeholders, meeting its demands quickly and efficiently, offering solutions while identifying and managing risks, observing the requirements of quality, health, safety and environment, complying with the applicable contractual, statutory, regulatory are further relevant requirements, adopting the best management and technology practices for our activities and ensuring our customers a standard of excellence for contract-ed products and services.

Offshore Support Vessel

Venturo Solutions started its business with the provision of specialized vessels to support O&G service providers in Malaysia.

With the critical nature of the oil and gas operations, we pride ourselves on having managed these operations with focus on contract management in accordance to Clients' needs.

Our Management track record shows us being capable of operating a fleet of specialised vessels capable of supporting subsea construction, IRM (Inspection Repair Maintenance), Hook-Up and MCM (Major Construction Maintenance) projects.

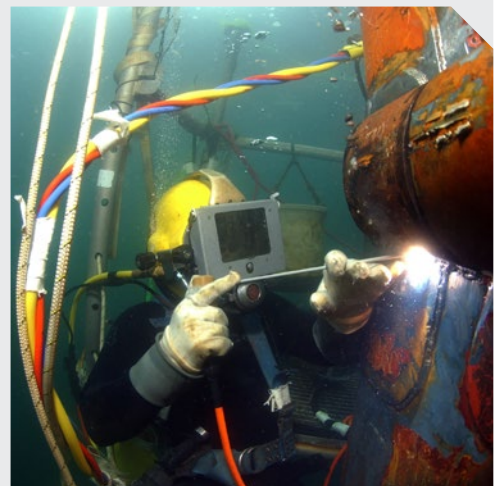

Underwater IMR

We have well established partnerships with multiple leading international ROV and Diving contractors and vessel owners that execute the following scope together with our own personnel that form the Project Management Team for the execution of IMR Projects.

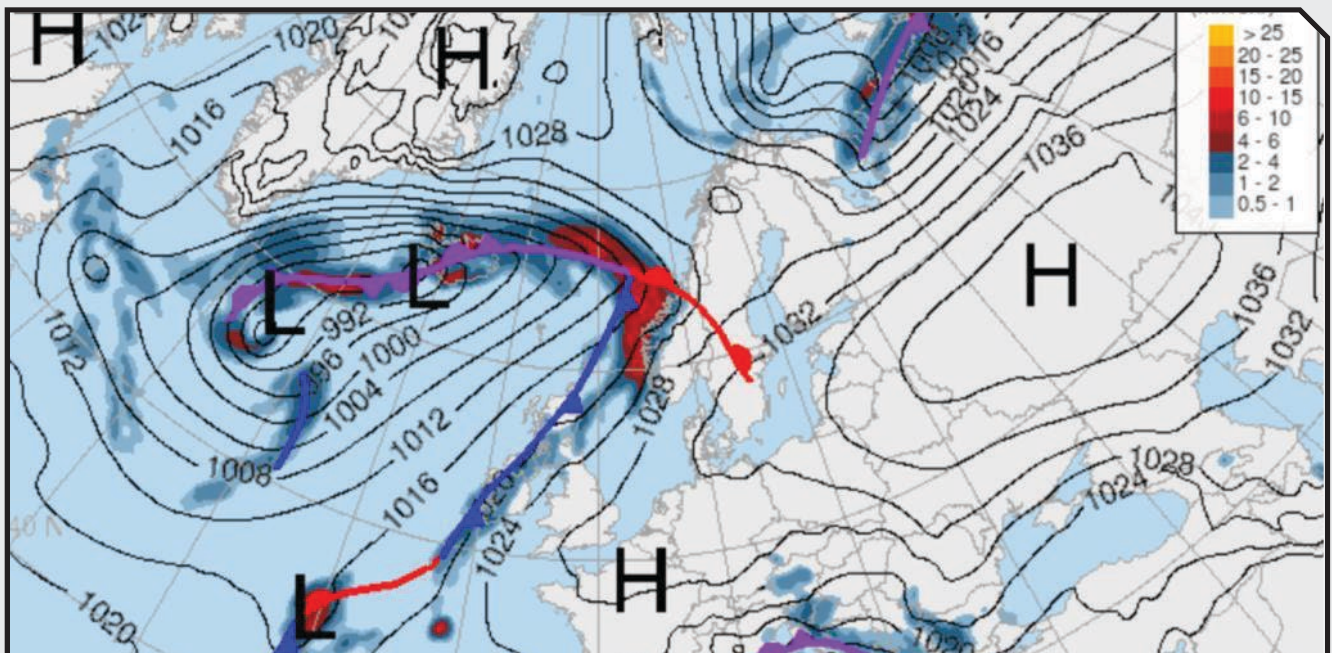

Subsea Services

- Underwater Inspection, Repair and Maintenance (IRM) Services
- Subsea Engineering & Construction Services
